CHAIRMAN'S REVIEW

The past year has been a period of great financial turbulence which has seen a flight from what are perceived as Risk Assets and this has resulted in a reduction in the value of our holdings. Additionally the drilling results of our two major holdings namely Sterling Energy Plc and Desire Petroleum Plc have been disappointing.

Sterling:
Sterling has been fully funded for the exploration well in Kurdistan but after nearly eighteen months of problems and difficulties the well was plugged and abandoned. Sterling remains well financed with some $100 million of cash plus the cash flow from Mauritania which more than covers the overheads. Sterling has recently announced that they had sold 50% of their stake in the Cameroon field in return for a contribution to past costs and a commitment to fully fund the joint development including drilling one exploration well. The Border dispute has not yet been settled and so the programme remains suspended until further progress on this issue.

Desire:
Desire completed its five well programme on its North Falkland licence acreage without a discovery and has subsequently completed its Seismic logging programme to enhance its knowledge of the field's geology. Desire would need to raise further finance to drill any additional wells. On the 12 October Rockhopper announced that it had agreed a Farm In with Desire on their licence area adjacent to Rockhopper's Sea Lion discovery which for fully funding the drilling costs of one well will earn a forty per cent interest in that well. The recent Rockhopper drilling results give cause for optimism concerning Desire's acreage adjacent to the Sea Lion discovery.

Argos Resources Plc:
Argos, our remaining holding, has now completed the Seismic mapping of its Licences revealing a number of interesting targets and if it is to commence drilling will have to raise fresh capital, or find a partner to fund the exploration campaign in exchange for a stake in the acreage.

The Future:
In all my previous statements in both the Interim and Final Reports I have indicated that it was your Boards intention to investigate various alternatives that would create on-going value for our shareholders as an alternative to returning capital to our shareholders. We will continue with this policy during the coming year.

Previously the commissions were paid to Ridge House Resources Limited, a company in which the late D G Williams was interested, however due to a restructure the rights to the commissions were re assigned on 7 July 2011 for all new and existing commissions due. On 25 July 2011, the outstanding commissions amounting to £93,972 were paid to Lion Crest Investment Ltd in full.

The Directors, from time to time, are entitled to an aggregate bonus calculated at 5% of the gross profit realised from any sale of shares in Sterling Energy plc.

The result for the year is set out on page 8 in the Statement of Comprehensive Income. The Directors do not recommend the payment of a dividend in respect of these financial statements (2010: £Nil). Further details on the Company's activities during the year have been set out in the Chairman's Review.

AUDITORS

In the case of each of the persons who are Directors at the time when the report is approved, the following applies:

- so far as the Director is aware, there is no relevant audit information (information needed by the Company's auditors in connection with preparing their report) of which the Company's auditors are unaware, and
- each Director has taken all the steps that he ought to have taken as a Director in order to make himself aware of any relevant information and to establish that the Company's auditors are aware of that information.

The auditors, Moore Stephens, have indicated their willingness to continue in office, and a resolution that they be re-appointed will be proposed at the next general meeting.

POLICY AND PRACTICE OF PAYMENT OF CREDITORS

The Company does not follow any specified code or standard on payment practice. However, it is Company policy to settle all debts owing on a timely basis, taking account of the credit period given by each supplier. The Company has few trade creditors and the majority of year end creditors were due to professional advisers. For this reason, the Directors consider that the publication of the number of creditor days would not provide meaningful information.

Westmount Energy Limited (the "Company") operates solely as an energy investment company. The investment strategy of the Company is to provide seed capital to small companies that are identified as having significant growth possibilities. FOR THE YEAR ENDED 30 JUNE 2011

2. ACCOUNTING POLICIES (*Continued*)

Foreign currency

a) Functional and presentational currency

The functional currency of the Company is United Kingdom Sterling, the currency of the primary economic environment in which the Company operates. The presentation currency of the Company for accounting purposes is also United Kingdom Sterling ("Sterling").

b) Transactions and balances

Foreign currency monetary assets and liabilities balances are translated into Sterling at the rate of exchange ruling on the last day of the Company's financial year. Foreign currency transactions are translated at the exchange rate ruling on the date of the transaction. Gains and losses arising on the currency translation are included in administrative expenses in the statement of comprehensive income in the year in which they arise.

Financial assets

The Company classifies its financial assets in the following categories:

- at fair value through profit or loss; and
- loans and receivables

The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of its financial assets at initial recognition.

a) Financial assets at fair value through profit or loss

The Company designates its financial assets as at fair value through profit or loss (FVTPL) as the financial assets are managed on and their performance is evaluated on a fair value basis. Financial assets carried at fair value through profit or loss are initially recognised at fair value and any transactions costs are recognised in the statement of comprehensive income. Regular purchases and sales of financial assets are recognised on the trade date, the date on which the Company commits to purchase or sell the investment.

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or the Company has transferred substantially all the risks and rewards of ownership. Financial assets at fair value through profit or loss are subsequently carried at fair value. Any gains or losses on derecognition of investments is calculated after setting the proceeds against the fair value and, in respect of a part disposal, against the fair value at the date of sale. The surplus or loss on realisation is transferred to the statement of comprehensive income.

Gains or losses arising from changes in the fair value of the 'financial assets at fair value through profit or loss' are presented in the statement of comprehensive income in the period in which they arise.

b) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets and are stated at cost, which is equivalent to their fair value. The Company's loans and receivables comprise 'trade and other receivables'.

Financial liabilities

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities.

Cash and cash equivalents

Cash and cash equivalents include cash in hand and deposits held at call with banks. For the purpose of the Statement of Cash Flow, cash and cash equivalents are considered to be all highly liquid investments with maturity of three months or less at inception.

Trade and other payables

Trade and other payables are not interest bearing and are stated at their cost, which is equivalent to fair value.

NOTES TO THE FINANCIAL STATEMENTS *(continued)*
FOR THE YEAR ENDED 30 JUNE 2011

2. ACCOUNTING POLICIES (*Continued*)

Equity, reserves and dividend payments
Ordinary shares are classified as equity. Share premium includes any premiums received on issue of share capital. Transaction costs associated with the issuing of shares are deducted from share premium. Retained earnings include all current and prior period retained profits. It also includes charges related to share-based employee remuneration.

Revenue Recognition
Revenue comprises interest income from short term deposits and is recognised on an accruals basis.

Expenditure
The expenses of the Company are recognised on an accruals basis in the Statement of Comprehensive Income.

Share options
Awards of share options are recorded under IFRS 2: 'Share-based Payment'. The cost of the share options are ascribed a fair value at grant date and accounted for as an administration expense of the Company with an equal Share Option Reserve being created in the statement of changes in equity. The cost is recognised in the statement of comprehensive income over the vesting period of the award.

3. TAXATION

The Company is subject to income tax at a rate of 0%.

The Company is registered as an International Services Entity under the Goods and Services Tax (Jersey) Law 2007 and a fee of £200 has been paid, which has been included in administrative expenses.

4. EARNINGS PER SHARE

The calculation of basic earnings per ordinary share is based on the comprehensive loss for the year of £3,319,302 (2010: gain £4,328,491). The weighted average number of shares in issue during the year was 7,206,327 (2010: 6,980,300). As explained in note 10 there are share options in issue over the Company's ordinary shares. As the exercise price of all these options at 30 June 2011 was below the average market price of the ordinary shares during the year, they would be deemed to have a dilution effect on earnings per share if the Company had made a profit. However as the Company has made a loss for the year this is not the case and therefore no diluted earnings per share has occurred.

10. SHARE PREMIUM AND SHARE OPTIONS (*Continued*)

As at 30 June 2011 250,000 (2010: 250,000) of the options were exercisable at a weighted average exercise price (adjusted) of 17p. At 30 June 2010 450,000 of the options were exercisable at a price of 38.5p and 100,000 of the options were exercisable at a price (adjusted) of 26p. These options were exercised in February 2011 as discussed in note 9.

The options granted in September 2009, were re-priced by a deduction of 45 pence from the original grant price to take into account the return of capital made to shareholders by the issue and redemption of B shares made during the financial year. The deduction of 45 pence accorded with the advice received by the Board from Ogier.

There were no share options granted during the year. Share options were granted during the year ended 30 June 2010 over 250,000 shares at a weighted average price of 62p, now adjusted to 17p as discussed above. The fair value of those options granted was £128,111 and was calculated using the Black Scholes valuation model. At the date of grant the volatility of the Company was estimated as 40.2651% and was calculated as the standard deviations of daily historical continuously compounded returns over a period commensurate with the expected life of the options, back from the date of grant, and annualised by the factor of square root 252, assuming 252 trading days per year. The risk-free rate was 2.81815% and is the yield to maturity on the date of grant of a UK Gilt Strip, with term to maturity equal to the life of the option. The expected life of the options is 5.14 years and is estimated as the mid-point between the date of grant and the date of expiry of the option.

On 28 January 2011 the options were re assessed as a result of the re pricing. The incremental fair value was assessed at £56,479 such that the total value of the options was £184,590. The incremental value was allocated over the remaining vesting period. The share options are ascribed a total expense for the year ended 30 June 2011 of £56,995 (2010: £32,847).

11. FINANCIAL RISK

The Company's investment activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk. The Company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Company's financial performance.

a) Market Risk

i) Foreign exchange risk

The Company is not exposed directly to foreign exchange risk as it invests in companies listed on the London Stock Exchange, denominated in Sterling and has cash balances denominated in Sterling.

ii) Price Risk

Price risk is the risk that the fair value of the future cash flows of a financial instrument will fluctuate due to changes in market prices. The Company is exposed to price risk on the investments held by the Company and classified by the Company on the Statement of Financial Position as fair value through profit or loss. To manage its price risk Management closely monitor the activities of the underlying investments.

The Company's exposure to price risk is as follows:

	Cost	Fair Value
Fair Value Through Profit or Loss, as at 30 June 2011	3,971,404	1,298,215
Fair Value Through Profit or Loss, as at 30 June 2010	3,670,017	5,485,350

The Company's investments are all publicly traded and listed on the Alternative Investment Market ("AIM").
The Company's sensitivity to a 15% increase/(decrease) in market price would be £194,732 /(£194,732) (2010: £822,803/(£822,803)). A positive number indicates an increase in the net assets attributable to ordinary share holders and a negative number indicated a decrease. The 15% increase/(decrease) on the net assets attributable to ordinary share holders would have the same impact on the post tax profit for the year. 15% represents management's assessment of a reasonably possible change in the market prices.

NOTES TO THE FINANCIAL STATEMENTS *(continued)*
FOR THE YEAR ENDED 30 JUNE 2011

11. **FINANCIAL RISK (*Continued*)**

iii) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is not significantly exposed to interest rate risk as it does not have any borrowings, however, the Company does have short term (<3 months) cash deposits, which exposes the company to effects of fluctuations in the prevailing levels of market interest rates on its cashflow.

An increase in the interest rates of 1% would cause the Company's net financial assets to increase by £1,417 (2010: £23,912). An equal change in the opposite direction would have decreased the net assets attributable to shareholders by an equal but opposite amount. 1% represents the Management's assessment of a reasonably possible change in interest rates.

The following table summarises the Company's exposure to interest rate risks.

Interest rate risk profile

Liabilities				
Trade and other payables	124,436	-	86,071	210,507

b) Credit Risk

Credit risk is the risk that an issuer or counterparty will be unable or unwilling to meet commitments it has entered into with the Company. The carrying amounts of the financial assets best represent the maximum credit exposure at the end of the reporting period. This also relates to the financial assets carried at cost, as they have a short term to maturity.

The Directors do not believe the Company is subject to any significant credit risk exposure regarding investments and trade receivables. The credit risk for cash and cash equivalents is considered negligible, since the counterparty is a reputable bank with high quality external credit ratings.

At the end of the reporting period, the Company's financial assets exposed to credit risk amounted to the following:

	2011 £	2010 £
Investments at Fair Value Through Profit or Loss	1,298,215	5,485,350
Trade receivables	7,228	7,015
Cash and cash equivalents	291,519	2,515,599
	1,596,962	8,007,964

The Company considers that all the above financial assets are not impaired or past due for each of the reporting dates under review and are of good credit quality.

FOR THE YEAR ENDED 30 JUNE 2011

11. **FINANCIAL RISK (*Continued*)**

c) Liquidity Risk

Liquidity risk is the risk that the Company cannot meet its liabilities as they fall due. The Company's primary source of liquidity consists of cash and cash equivalents and investments held at fair value through profit or loss. The Company's investments at fair value through profit or loss are publicly traded and are deemed highly liquid. The Company also has the ability to issue additional share capital to facilitate the capital management of the Company.

The following table details the contractual, undiscounted cash flows of the Company's financial liabilities.

As at 30 June 2011

	Up to 3 months	Up to 1 year	Over 1 year	Total £

Capital Management

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern in order to provide optimum returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce cost of capital.

In order to maintain or adjust the capital structure, the Company may issue new shares, return capital to shareholders or sell assets. The Company does not have any debt nor is the Company subject to any external capital requirements.

Fair Value Estimation

The Company has classified its financial assets as fair value through profit or loss and fair value is determined via one of the following categories.

Level I – An unadjusted quoted price in an active market provides the most reliable evidence of fair value and is used to measure fair value whenever available. As required by IFRS 7, the Company will not adjust the quoted price for these investments, (even in situations where it holds a large position and a sale could reasonably impact the quoted price).

Level II – Inputs are other than unadjusted quoted prices in active markets, which are either directly or indirectly observable as of the reporting date, and fair value is determined through the use of models or other valuation methodologies.

Level III – Inputs are unobservable for the investment and include situations where there is little, if any, market activity for the investment. The inputs into the determination of fair value require significant management judgment or estimation.

The investments held by the Company fall within Level 1 as they are valued by unadjusted quoted prices.
